registration form

**NOTE:** PARTICIPANTS ARE REQUIRED TO KEEP THEIR **CAMERAS ON** THROUGHOUT THE TRAINING. THOSE WHO FAIL TO DO SO MAY BE **REMOVED** FROM THE SESSION.

## COURSE OUTLINE

Medical Gas Systems are vital to patient safety, clinical operations, and facility management in all healthcare settings. This comprehensive online training provides participants with a detailed understanding of medical gas infrastructure, regulatory compliance, operational safety, and cross-departmental responsibilities, based on MSQH Standard 3: Facility and Biomedical Equipment Management and Safety (6th Edition).

The training emphasizes a system-wide view of managing medical gases—from storage and distribution to emergency preparedness and performance monitoring. It highlights standards compliance (MDA Act 737, MS 2675, PHFSA), safety precautions, and documentation best practices expected during accreditation.

## TRAINING PROGRAMME:

08:00 AM	Participant Log-in & Registration
08:30 AM	Opening Remarks & Programme Introduction
08:45 AM	MSQH Overview – Facility & Biomedical Equipment Management Standards
09:45 AM	Bio Break
